Doug and Jim,
If we are going to discuss the Navy's view of ensuring the 500ppb detected south of the Hempstead Turnpike is targeted then we should have a separate call without NG. A separate call can be setup to discuss other concerns with NG regarding the Hot Spot.
R/
Lora

Lora

I will send out a meeting invite for 2:00 to 3:30. I doubt we will need all that time unless we decide to invite Ed. You inquired as to whether he would participate in the call. I did not originally intend to invite him, but it might be a good idea to include him in part or all of the discussions. I am open to suggestions. I see 3 options: 1) We could talk without him for the first 45 minutes and ask him to call in at 2:45; 2) we could include him in all of the discussion or 3) we could do the call without him. Let Jim and me know your preference.

Thanks

Doug

Doug,
Tuesday afternoon is fine. I will be available from 1:30 to 3:30pm.

Regarding the pilot study, my consultant, Resolution, has sent the scope of work and copies of the "typical" subcontract forms to BWD to review. The scope of work is the same that the Navy send to BWD in March so they should be very familiar with the work that the Navy would like them to perform. The subcontract forms include the terms and conditions for field services, supplier profile and W9 forms, description of insurance requirements, and the contractor Health and Safety prequalification. The information was sent to BWD on June 26 and July 6 respectively. Resolution has not received anything from BWD.

R/
Lora

Hi Lora

Would Tuesday afternoon work for you? If it does not could you suggest other dates/times next week? I will likely need to take off one day next week (not Tuesday), but won't know what date that will be until tomorrow.

Also, in the meantime could you let Jim and I know whether necessary approvals/agreements have been made with BWD to allow the pilot to move forward?

Thanks

Doug

Hi Doug,
I would like to get some graphics together before we have the call. What is your schedule for next week? Will Northrop Grumman be participating in the call?
R/
Lora

Hi Lora

I see that Richard will be out until August 3. Perhaps you, Jim and I could go ahead and have a call without Richard as I will be out the week of Aug 3 and 10.

Thanks

Subject: Conference Call

Hi Richard

When we spoke Friday before last we agreed to try and arrange a conference call with Jim to discuss efforts to remediate the hot spot.

Would you be available for a call this afternoon around 2? If not could you suggest another time this afternoon or later this week?

We would want to discuss the status of your management's review of ensuring the 500ppb detected south of the Hempstead Turnpike is targeted for capture as well as the status of the pilot work proposed for BWD Plant 6.

Thanks

Doug
